PT[®] Brand Pressurized Insecticides

PT

PT stands for Pressurized Technology.
But with our portfolio, it stands for so
much more.

Treat a wide range of pests with only two letters.

As the company that pioneered pressurized technology for pest control, BASF is the name pest management professionals trust. With the PT® Brand pressurized insecticides portfolio, pest management professionals can be confident that they'll kill a wide range of pests effectively, conveniently and cost-efficiently. PT means having the right solution. For the right location. At the right time.

Our innovative PT aerosol products are premixed, ready-to-use and equipped with a high-precision application system that makes them easy to deliver. Pest management professionals can directly target the key harborage areas where insects eat, rest and reproduce — without extra equipment or cleanup. Our pressurized technology can provide quick relief in key areas of infestation, providing customers worry-free peace of mind.

Contact

Pressurized contact insecticides enhance inspections with excellent flushing action and knockdown. Their non-residual nature even makes them great choices for everyday use within sensitive accounts, including commercial kitchens. BASF is proud to have assembled one of the most effective and popular collections of pressurized contact insecticides.

PT® PI.® Pressurized Contact Insecticide

A.I. 0.5% Pyrethrins, 4% PBO
Packaged 12 x 18 oz

Fast drying formulation
Excellent for space treatment
Registered for use in food handling areas

PT® 565 Plus XLO Pressurized Contact Insecticide

A.I. 0.5% Pyrethrins, 1% PBO,
1% MGK-264
Packaged 12 x 20 oz

Excellent for use during
inspections
Registered for use in food
handling areas

Non-Repellent

Non-Repellent insecticides are undetectable to pests, do not scatter or disperse them throughout an account, and are excellent choices to use in conjunction with baits as they do not affect palatability. Excellent for use in rotation for resistance management, these non-repellents are staples in the fight against a broad range of pests.

PT® Alpine® Pressurized Insecticide

A.I. 0.5% Dinotefuran
Packaged 12 x 17.5 oz

Reduced risk non-repellent aerosol*
Registered for use in food handling areas
A great rotational partner in a non-repellent program

*Dinotefuran, the non-repellent active ingredient in Alpine insecticides, has been granted Reduced Risk status for public health and food handling use by the EPA

PT® Phantom® II Pressurized Insecticide

A.I. 0.5% Chlorfenapyr
Packaged 12 x 17.5 oz

Non-repellent aerosol with broad spectrum control including
bed bugs, ants and cockroaches
Registered for use in food handling areas

PT® Brand Pressurized Insecticides

All PT Brand pressurized insecticides are high-performance aerosol formulations delivered with the industry's most advanced pressurized technology. The unique products in this portfolio provide the right solutions at the right time, all in the right location for treating a wide range of pests.

Specialty

Many pest infestations are best controlled using highly specialized product formulations intended for specific situations. As a leader in product formulation technology, BASF provides the professional pest management industry with a wide variety of innovative specialty tools so you always have the solution you need.

PT® Alpine® Pressurized Fly Bait

A.I. 1% Dinotefuran
Packaged 6 x 16 oz

Ready-to-use fly bait spray
Fast-acting
Versatile label directions include residential, commercial, and event uses

PT® Alpine® Flea & Bed Bug Pressurized Insecticide

A.I. 0.25% Dinotefuran,
0.1%, Pyriproxyfen,
0.05% Prallethrin
Packaged 12 x 20 oz

Kills adult fleas for up to 30 days
Reduced Risk aerosol*
Label includes bed bugs and ticks

*Dinotefuran, the non-repellent active ingredient in Alpine insecticides, has been granted Reduced Risk status for public health and food handling use by the EPA

PT® Ultracide® Pressurized Flea Insecticide

A.I. 0.05% Pyrethrins,
0.4% Permethrin,
0.1% Pyriproxyfen,
0.4% MGK-264
Packaged 12 x 20 oz

No mixing, ready-to-use IGR pyriproxyfen kills hatching eggs for up to seven months
Low odor formulation
Treats over 2,600 square feet

PT® Wasp-Freeze® II Wasp & Hornet Insecticide

A.I. 0.1% Prallethrin
Packaged 12 x 17.5 oz

Kills wasp and hornets on contact
Jet spray kills from 15 feet away

PT® Tri-Die® Pressurized dust Insecticide

A.I. 0.6% Pyrethrins,
8% Amorphous Silica,
4.8% PBO
Packaged 12 x 8 oz

Fast acting residual insecticide dust
Very repellent

Restricted use in CT and NY

PT® Clear Zone® III Metered Pyrethrin Spray

A.I. 1% Pyrethrins, 5% PBO
Packaged 6 x 6.25 oz

Repellency of flying insects
6,000 cubic feet coverage
Fits most battery operated metered dispensing devices

PT® Pro-Control® Formula 2 Total Release Pressurized Insecticide

A.I. 0.5% Pyrethrins, 4% PBO
Packaged 6 x 6 oz

Versatile contact insecticide
Commercial food handling areas and restaurants/
animal housing
Great choice for treatment of: cockroaches, flies, stored product pests, spiders, ticks, wasps

C = Caution

Work Smarter with PT + System III

The BASF aerosol lineup works even more effectively and efficiently when paired with the System III. The System III is designed to make pest management professionals even better at what they do with precise, easy-to-deliver applications of compatible PT Brand products into the most hard-to-reach areas. Plus, its modern look elevates the professional image of PMPs while the state-of-the-art design increases the practicality and profitability of compatible PT pressurized insecticides.

To learn more about the System III and all of the available PT brands, visit pestcontrol.basf.us.

Always read and follow label directions.
